Course syllabus

Artificiell intelligens
Artificial Intelligence

EDAP01, 7,5 credits, A (Second Cycle)

Valid for: 2020/21
Decided by: PLED C/D
Date of Decision: 2020-03-30

General Information
Main field: Machine Learning, Systems and Control.
Elective Compulsory for: MMSR1
Elective for: BME4, C4-pv, D4-pv, D4-mai, E4-bg, F4, F4-mai, MSOC2, Pi4-bam
Language of instruction: The course will be given in English

Aim

To give an introduction to several subdomains of artificial intelligence and to give an orientation about fundamental methods within these domains. To convey knowledge about breath and depth of the domain. To provide insight about the ethical consequences of AI-based technology.

Learning outcomes

Knowledge and understanding
For a passing grade the student must

• display basic knowledge concerning theories and methods related to the following subdomains: intelligent agents, heuristic search, game programming, knowledge representation, knowledge-based systems, probabilistic reasoning, machine learning, natural language processing.

Competences and skills
For a passing grade the student must

• complete a number of assignments based on problems related to some of the following subdomains: heuristic search, knowledge-based systems, probabilistic reasoning, machine learning, natural language processing.
• demonstrate ability to critically, autonomously and creatively identify, formulate and
handle problems requiring algorithms belonging to AI.

Judgement and approach
For a passing grade the student must

- demonstrate ability to identify needs for additional knowledge and to continuously develop new skills.
- demonstrate ability to critically judge the ethical and societal consequences of using AI in particular context.

Contents

Examination details
Grading scale: TH - (U,3,4,5) - (Fail, Three, Four, Five)
Assessment: To qualify for a passing mark, the students must have completed the obligatory programming assignments. To qualify for a higher mark a written examination is required.

The examiner, in consultation with Disability Support Services, may deviate from the regular form of examination in order to provide a permanently disabled student with a form of examination equivalent to that of a student without a disability.

Admission
Admission requirements:

- EDAA01 Programming - Second Course or EDAA30 Programming in Java - Second Course or FRTF25 Introduction to Machine Learning, Systems and Control

Assumed prior knowledge: FMAA01, FMA420 and FMA430.
The number of participants is limited to: No
The course overlaps following course/s: EDA132, EDAF70

Reading list

Contact and other information
Course coordinator: Professor Jacek Malec, Jacek.Malec@cs.lth.se
Teacher: Professor Pierre Nugues, Pierre.Nugues@cs.lth.se
Teacher: Elin Anna Topp, Elin_Anna.Topp@cs.lth.se
Teacher: Stefan Larsson, Stefan.Larsson@lth.lu.se
